#### Memorial Heights Redevelopment Authority Competitive Sealed Proposal Two Step Process

Memorial Heights Redevelopment Authority (TIRZ No. 5) may procure construction projects via the Competitive Sealed Proposal Method as authorized in Chapter 2269, Texas Government Code (the "Code"). To the extent a particular construction project does not require a different bidding process, and if the Authority chooses to use this method for a construction project, the Contractor will be selected using a two-step process.

In Step One, the Authority publishes an advertisement or solicits qualifications from interested proposers. A committee made up of representatives from the Authority Board of Directors shall review each Proposer's Statement of Qualifications (SOQ) and rank them based on the criteria set out by the Authority. Appropriate City of Houston Department personnel, the Authority President (or Administrator) and the Authority Engineer will participate as advisors or members of the committee as directed by the board. Criteria, and the weighted value of the criteria, shall be determined by the Authority for the respective construction project. In addition to criteria permitted by the Code, other common criteria may include completion of SOQ in accordance with the instructions and Hire Houston First. After reviewing each Proposer's qualifications, the Committee finalizes the rankings and may short-list the Proposers to participate in an interview process. After reviewing the Proposers' qualifications and completing any interview, the Authority finalizes the rankings and may short-list the Proposers to participate in Step Two.

In Step Two, the Authority will notify the short-listed Firms of their selection and request that they submit a proposal for the construction project in accordance with the Request for Competitive Sealed Proposals (typical bidding process). In the typical bidding process, the Authority shall provide the short-listed Proposers a request for competitive sealed proposals that includes construction documents and other information that a contractor may require to respond to the request. The short-listed Proposers shall then

submit sealed bid packages that include pricing for the proposed improvements, along with bid bonds to secure the bid prices and any other information required in the request for sealed bids. The sealed bid packages are received by the Authority at a specified date, time, and place and publicly opened and read. The bids are tabulated and checked by the Engineer. The bid bonds are verified, and the apparent, qualified low bidder is identified.

All of the instruction can be done at your own pace in your own home or office. All you need to complete the course is access to the internet and a physical mailing address.
