TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

March 04, 2010

CERTIFIED MAIL #

91 7108 2133 3935 2304 7281

Sent corrected letter 3/15

Mr. Scott Burkey
Motiva Enterprises LLC
7750 N. MacArthur, Suite 120, PMB 319
Irving, Texas 75063

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Subsurface Release of Hydrocarbons at Shell Retail Fuel Facility, 8041 North Loop West, Houston (Harris County), Texas (LPST ID No. 117756; Priority 4.1; Facility ID No. 23126) R-12

Dear Mr. Burkey:

This letter confirms the completion of corrective action requirements for the release incident at the above-referenced facility. Based upon the submitted information and with the provision that the documentation provided to this agency was accurate and representative of site conditions, the site has met closure requirements. Therefore, no further corrective action is necessary. The justification for final closure includes, but is not limited to, the following criteria:

- maximum soil concentrations in the unsaturated zone do not exceed health-based target levels or default construction worker target levels;
- although groundwater concentrations are above Plan A Category II levels, the maximum concentrations are below default construction worker target levels;
- the groundwater plume appears to be adequately delineated to potential receptors and to decreasing concentrations from the source;
- the groundwater plume appears to be stable and/or declining in concentration; and,
- identified potential receptors do not appear threatened by this release.

Please note that financial assurance must be maintained for all operational storage tanks at this site. Please be aware that case closure is based on identified exposure pathways and that any remaining contaminant levels and potential exposure pathways should be evaluated when conducting any future soil excavation or construction activities at this site. Please ensure that any wastes generated from these activities are handled in compliance with all applicable regulations.

Please be advised that all monitor wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned pursuant to Chapter 32.017 of the Texas Water Code and in accordance with Title 16, Texas Administrative Code (TAC), Section 76.1004. A State of Texas Plugging Report (Form No. TCEQ-0055) is required to be submitted to the Water Well Drillers Section of the Texas Department of Licensing and Regulation, P.O. Box 12157, Capitol Station, Austin, Texas 78711, within thirty

RECEIVED
MAR 23 2010
TCEQ
CENTRAL FILE ROOM

(30) days of plugging completion. If you have any questions regarding the future use of an existing monitor well, please contact the Texas Department of Licensing and Regulation at 512/463-7880 or 800/803-9202.

If any monitor well plugging or other necessary site restoration activities will be performed to complete site closure, complete a *Final Site Closure Report* and submit the report to the Central Office in Austin to document actual site closure. For sites eligible for reimbursement through the Petroleum Storage Tank Remediation Fund, written preapproval should be obtained prior to initiation of site closure activities. Reimbursement claims for activities that are not preapproved will not be paid until all claims for preapproved work are processed and paid.

Please note that the *Final Site Closure Report*, if necessary, will be the last submittal associated with this case. This letter signifies the completion of corrective action associated with the release. No subsequent TCEQ correspondence will be issued in response to the *Final Site Closure Report*.

Should you have any questions, please contact Mr. David Bratberg of Darcy Environmental Group (TCEQ Privatization Contractor) at dbratber@tceq.state.tx.us or 512/342-8585, extension 203. **Please reference the LPST ID Number when making inquiries.** Your cooperation in this matter has been appreciated.

Sincerely,

Susan N. Longbine

(LPST ID No. 117756; Priority 4.1; Facility ID No. 23126) R-12

Site History

LPST & RDR: LPST 098541; soil & GW data in L boxes below. Site had NAPL in MW-2 & MW-6 in 1996-1999. Priority 4.1; DTW 7'; Closed 01/30/04

Release Determination

July 2007 - Phase II. Five temp MWs installed at active UST facility, soil & GW samples collected.

soil samples maximum (ppm)

benzene 0.026	toluene 8.200	ethylbenzene 7.600	xylenes 120.000	MTBE 0.62	TPH C_{12}-C_{28} >MDL	PAH B(a)P 0.56, rest>1
51.70	**296**	**82.09**	**298.46**	**0.632**	208	39.5 Naph
L 168					1332	113.7 BTEX

groundwater sample maximum (ppm): TW03

benzene 0.005	toluene 1.000	ethylbenzene 0.700	xylenes 10.000	MTBE 0.240	TPH C_{12}-C_{28} >MDL	PAH B(a)P 0.0002, rest>0.4
156.0	**714**	**266**	**1113**	**5.794**	**7.30**	**375 TBA** need PAH
L 4.91					23.1	14.548 BTEX

RDR Conclusions/Recommendations

- soil > action level;
- GW > action level;
- LAD DWS submitted w/ RDR

Soil Assessment

maximum soil concentrations (ppm): TW-4 (9-11') had 51 ppm Benzene, MW-1 installed adjacent, but did not analyze for BTEX, only toluene?

- Benzene: 51.7 (TW-04, 9-11') saturated, hottest concentration above water table has lower toluene (only COC run on subsequent samples)
- Toluene: 296. (TW-04, 9-11') 3.178 in MW-1 at same depth
- Ethylbenzene: 82.09 (TW-04, 9-11')
- Xylenes: 298.5 (TW-04, 9-11')
- TPH (DRO): 208. (TW-04, 9-11')
- PAH: < Plan A

NAPL

- No NAPL

Groundwater Assessment

- DTW: 4-7'
- The gradient appears to be to the east; previous LPST case was towards the north
- TDS: 1160 ppm
- MWs: 7
- GWM events: 08/08 to 05/09
- Groundwater maximums (mg/L):

	Historical (2008-2009)	Latest (05/07/09)
Benzene:	14.60 (MW-1, 08/04/08)	10.04 (MW-2)
Toluene:	24.72 (MW-1, 08/04/08)	14.07 (MW-1)
Ethylbenzene:	2.309 (MW-1, 08/04/08)	2.013 (MW-1)
Xylene:	10.38 (MW-1, 08/04/08)	8.500 (MW-1)
MTBE:	5.403 (MW-1, 08/04/08)	3.704 (MW-1)
TPH (DRO):	3.39 J (MW-2, 02/02/09)	<4.83 (all)
PAH:	NOT	

Drinking Water Survey Report

DWSR submitted 06/23/08; 1 water well located in ½ -mile water well search; 1 within 1/4-mile public supply, deep; 0 within 500'. NNR for private water well notification; NNR for previous LPST case. Well is located ~1/2 mile east of site, TD 1440', top screen 665'

Pathway evaluation:

- maximum soil concentrations in the unsaturated zone do not exceed health-based target levels or default construction worker target levels;
- although groundwater concentrations are above Plan A Category II levels, the maximum concentrations are below default construction worker target levels;
- the groundwater plume appears to be adequately delineated to potential receptors and to decreasing concentrations from the source;
- the groundwater plume appears to be stable and/or declining in concentration; and,
- identified potential receptors do not appear threatened by this release.

Current Submittal:

06/23/08: RDR & DWSR . Issue LPST 117756; NNR for DWSR. No evaluation related to previous LPST case

11/17/08: Rqst Ext. Send fax, give extension, note previous LPST case

02/04/10: RBA, SCR, PA13. Data from 7 MWs. One hot soil sample (51 ppm) below at 9'; other soil samples < CW & health based. GW stable to decreasing < default CW targets. Ok to close.

Subject: Texaco Retail Fuel Facility
801 North Loop
Houston, Texas
Facility ID No. 23116
LPST No. 98541

Dear Mr. Bratberg:

Please find attached the Final Site Closure Report for the Texaco Service Station located at 801 North Loop in Houston, Texas. Monitoring wells were plugged and abandoned on February 17, 2004. Also attached are state plugging reports and photographic documentation. The property west of the site was repaved. Monitoring well MW-11 could not be located and is assumed to be destroyed.

If you have any further questions please do not hesitate to call, 713-734-3090.

FINAL SITE CLOSURE REPORT

Use this form to provide information on LPST site closure activities after site closure has been authorized. To request authorization for site closure, complete and submit the *Site Closure Request* form (TNRCC-0028).

Complete All Applicable Blanks.

Date: *03/23/04*

GENERAL INFORMATION

LPST ID No.: *98541* Facility ID No.: *23116*

Responsible Party: *Motiva Enterprises LLC*

RP Address: *13258 FM 1960* City: *Houston* State: *TX* Zip: *77065*

Facility Name: *Texaco Retail Fuel Facility*

Facility Address: *801 North Loop*

Facility City: *Houston* County: *Harris*

CLOSURE ACTIVITY

Was a remediation system installed? ☐ **YES** or ☒ **NO** (check one) If yes, provide a description:

Was this system removed? ☐ **YES** or ☐ **NO** (check one) If no, explain why not:

What is the intended future use/disposition and location of the system:

List the components of the remedial system removed:

List any of the remedial system components remaining at the site:

Provide a description of site restoration activities: *Monitoring well casing was removed from the ground and the boring was filled with a cement/bentonite grout. The upper six inches of the boring was filled to the ground surface with concrete.*

RE: File Review of the Subsurface Release of Hydrocarbons at Fiesta Mart, Inc., 2807 North Shepherd, Houston (Harris County), Texas
LPST ID No. 109139; Facility ID No. 001502; Priority 4.1; R-12

Note: the case file is missing at Central Records.

Release Determination

- February 1995 - a release was reported following the removal of four USTs and associated piping. Note that only three tanks (two 8K and one 4K gasoline) are listed in registration. It appears that the fourth tank contained waste oil (see CARF dated 6/5/95).
- Maximum soil concentrations:
  - benzene 51.6 ppm (west wall, 8')
  - BTEX 1,088 ppm (west wall, 8')
  - TPH 2,337 ppm (south wall, 8').
- The excavated backfill was returned to the former tankhold.
- A NOC was issued on 2/22/05 by Region 12.

Exposure Pathways Open: None

- ☐ GW Ingestion (onsite - current)
- ☐ GW Ingestion (onsite - future)
- ☐ GW Ingestion (offsite - current)
- ☐ GW Ingestion (offsite - future)
- ☐ Construction Worker
- ☐ plume stability monitoring
- ☐ Soils- Exp. Vapor
- ☐ Soils - Health
- ☐ NAPL, DTW <15'
- ☐ GW to surface water
- ☐ Other _____

Site Characteristics

- Current use of the site is commercial/industrial.
- Anticipated future use is to remain commercial/industrial.
- Surrounding land use is mixed residential and commercial.
- Impervious cover is reported as
- Site lithology: clayey silt to silty sand of the Beaumont Formation
- Major/minor aquifer name: Gulf Coast

Soil Assessment

- Assessments were conducted in 1995-1997, 2000, and 2003.
- At least 12 soil borings installed to date; 7 completed as monitoring wells.
- Maximum soil concentrations:

		Confirmation Boring (12/2003)
Benzene	**13 ppm** (B-9, 8'-10')	*0.307 ppm (SB-10, 10-11ft)*
BTEX	402 ppm (B-9, 8'-10')	*1.762 ppm (SB-10, 10-11 ft)*
TPH	3,446 ppm (B-9, 8'-10')	*BDL (SB-10, 10-11 ft)*

- *Max soil concentrations detected during tank removal occurred at west wall of tankhold. Soil boring B-9 was installed on 1/11/00 just west of former tankhold. Benzene conc. still exceeded health-based concentrations. SB-10 was installed in same location on 12/12/03. Concentrations now protective of construction workers.*
- *A vapor survey was performed on 11/28/06. No vapors were detected.*

Groundwater Assessment

- Seven (7) MWs installed (MW-1 through MW-6, and MW-16); 6 wells remain. MW-2 has apparently been plugged (see CARF 3/3/04).
- Depth to water range: approx. 6-8 feet.
- Groundwater gradient is generally toward the west.
- TDS concentration: 1,060 ppm
- Documented use of affected zone: No
- Beneficial Use Category: Category II
- 13 gw monitoring events from Feb. 1995 to May 2006. Maximum concentrations detected were:

	Historical	*Current (5/1/2006)*
Benzene	14.32 ppm (MW-1, 11/5/96)	*0.501 ppm (MW-1)*
BTEX	28.16 ppm (MW-3, 7/8/97)	*2.94 ppm (MW-1)*
MTBE	44.8 ppm (MW-3, 10/29/97)	*2.18 ppm (MW-1)*
TPH	28 ppm (MW-1, 11/5/99)	*BDL*
PAHs	<Plan A targets (several wells)	*<Plan A targets (MW-1)*

- MW-1 and MW-3 are adjacent to the south and north wall of the former tankhold. MW-3 is also adjacent to the utility lines.

NAPL

- NAPL has been reported in MW-1 and MW-3.
- Maximum thickness was 0.26 ft. recorded in MW-1 on 9/2/98.
- November, 2006, thickness of .02 ft in MW-3.
- An 8-hour MDPE event in 2004 recovered only 1.5 gallons of product.

Receptors and Priority/Category

- One water well was identified as being within 0.5 miles of the subject property. This well is screened from 440 to 460 feet and is used as for irrigation at a commercial nursery. The well is located approx. 1,350 feet from site and does not appear.
- Underground Utilities:
- Surface Water: None within 0.5 miles.
- Municipal water is supplied by the city of Houston.
- Site priority: 4.1, formerly 2.2 but vapor survey detected no vapors.

Receptor Pathways/Plume Delineation

- Figure 1 – Groundwater Ingestion
  1) Current Onsite - no wells - closed
  2) Current Offsite - no wells - closed
  3) Future Onsite - no groundwater use, municipal supply - closed
  4) Future Offsite - no groundwater use, municipal supply - closed
- Figure 2 - GW < construction worker defaults – closed
- Figure 3 – Soils
  1) Maximum soil concentrations < health based conc. – closed
  2) *Measured vapors show no potential for explosive vapors – closed*
  3) Soil to GW exceeds, current GW impact above Cat I, refer to figure 1
- Plume delineation- Plume is adequately delineated to MCLs and appears to be stable/declining.

Conclusions and Recommendations

This site remains eligible for reimbursement (MM-EXT 10/14/05).

August 2006 MES - Report documents first monitoring event. Concentrations have decreased since last monitoring event in 2003. No NAPL was encountered. Priority will be changed from 2.2 to 4.1. Monitoring should continue to verify plume stability.

April 2006 Extension Request

- New assignment. The case file is currently missing at Central Records. Reviewed available data and updated CFM. This case will be difficult to review for closure in the future without assessment and monitoring data.
- Quarterly monitoring was preapproved on 3/30/06.
- The new RCAS (InControl Technologies) is trying to obtain copies historical documents from the previous consultant. Extension to respond to the 3/30/06 CARF requested (to 6/15/06). Issue fax. Approve cost to complete a MESSR after the 1st quarterly event, in order to obtain current data now instead of waiting for AGMR in mid-2007.

Dec 27, 2006 MPR - Proposal to place sorbent sock in MW-3. Reject P19, Request vapor survey to verify priority, close if no vapor issues.

Feb. 8, 2007 *Tech. Resp., SCR, Prop 13 - Report documents results of vapor survey. No vapors were detected. Case file is still missing. Site closure appears to be appropriate based on the following:*

- *There are no water wells within ½ a mile radius of the site that are completed in the shallow impacted groundwater zone.*
- *The groundwater contaminant plume is stable/decreasing in size and concentrations.*
- *The maximum soil and groundwater concentrations are below the default target concentrations for construction worker exposure.*
- *There appears to be no threat of explosive vapors at this site.*
- *Identified potential receptors do not appear threatened by this release.*

North Shepherd Phillips 66
2802 North Shepherd Drive
LPST 091026

Site Chronology

1985 - Subsurface investigation following gasoline release.
02/89 - A remediation system was installed. System O&M, Site monitoring, PSH Recovery
07/96 - Remediation system shutdown
11/96 - Plan B Risk Assessment was submitted
03/97 - TNRCC Plan B Response Letter was received

AES is in the process of responding to TNRCC comments forwarded in the Plan B Response Letter dated March 26, 1998.

Current Work

A site vicinity map has been completed showing subsurface utilities.

A vapor assessment has been completed.

PAH analysis has been run on ground water sample collected from MW-1.

Due to the proximity of the adjacent property and the location of the Loop 610 feeder road, the area for delineation east of MW-1 is restricted.

Current work includes semiannual ground water monitoring and sampling. The June 1998 sampling event indicated that benzene concentrations are protective of the construction worker. AES will continue to monitor for plume stability.

Future Work - Closure

Monitor and sample for plume stability - CARF dated 12/31/98

Exit Criteria Flow Charts will be completed.

Drillers reports will be provided as requested in 12/98 CARF.

The flowcharts indicate that this site is eligible for closure. MW-16 located on the adjacent Fiesta Mart site has shown a steady decline in hydrocarbon concentrations since the shutdown of the remediation system and the data was included in the preparation of the flow charts.

Analysis of ground water samples (BTEX,TPH,PAH) collected from MW-1 indicate that all concentrations are protective of the construction worker.

CERTIFIED MAIL

Dr.Song Ahn
4444 Westchester Street
Houston, Texas 77005-3762

Re: Leaking Product Storage Tank (LPST) Case Closure of Subsurface Hydrocarbons at the Latin American Motor Company, Houston (Travis County), Texas
(LPST ID No. 106628 Facility ID No. 064543)

Dear Mr. Ahn:

This letter confirms the completion of corrective action requirements for the release incident at the above-referenced facility. Based upon the submitted information and with the provision that the documentation provided to this agency was accurate and representative of site conditions, we concur with your certification that the site has met the closure requirements. No further corrective action is necessary.

For any subsequent release after case closure from an underground or aboveground storage tank at sites eligible for reimbursement, the deductible will be increased in accordance with Section 26.3512 of the Texas Water Code. Additionally, if any storage tanks are operated at this site, the owner or operator must now secure financial assurance to cover the deductible in accordance with the appropriate provisions of Title 30, Sections 334.91-334.109 of the Texas Administrative Code.

Should you have any questions, please contact Ms. Barbara Roeling of my staff at 512/239-2200. **Please reference the LPST ID Number when making inquiries.** Your cooperation in this matter has been appreciated.

Sincerely,

Chet Clarke

INTEROFFICE MEMORANDUM

TO : FILE

THRU : Chet Clarke, Section Manager
Responsible Party Remediation Section
Petroleum Storage Tank Division

FROM : Delonda Alexander, Team Leader, Team III

SUBJECT : Barbara Roeling, Coordinator, RPR Unit II

File Closure of Subsurface Release of Gasoline at the Latin American Motor Company, Houston, (Harris County), Texas
(LPST ID No. 106628 Facility ID No. 064543)

DATE: April 19, 1996

On May 3, 1993, three gasoline USTs were removed from the ground at the above-referenced facility. No holes were detected in the tanks, and they were described as being in fair to good condition. Initial soil samples reflected the highest soil contaminant levels under Tank No.3, with a Benzene level of 1.93 ppm, a BTEX level of 9.66ppm, and a TPH level of 150 ppm. A hydraulic lift was also discovered and removed. Samples from beneath the hydraulic lift reflected a maximum TPH concentration of 4880 ppm.

Approximately 16,000 gallons of water were pumped from the UST before removal. The water was apparently being used as a ballast for the tanks, and after removal, was treated and discharged.

The tankpit was overexcavated to a depth of 16 feet, and another set of bottom samples was taken from underneath Tank No. 3 and the hydraulic lift. Moist sands were evident, however, no groundwater was encountered. Soil samples from under Tank No. 3 were now non-detect for both BTEX and TPH, and the hydraulic lift soil samples indicated a maximum TPH concentration of 52 ppm.

The principle aquifer in this area is found at a depth of at least 150 feet. The perched water found at depths of approximately 15-20 feet is not considered a useable water source.

Based upon this and all information available to us at the time, no further remedial action is warranted and a letter of final concurrence should be issued to the responsible party.

Barbara Roeling

Bellaire, TX 77401

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Subsurface Contamination at the Former McQuillan Surveying, Inc. Facility, 2018 North Shepherd, Houston (Harris County), Texas
(LPST ID 111825 - Facility ID 0068766 - Priority 4.1); R-12

Dear Ms. McQuillan:

This letter confirms the completion of corrective action requirements for the release incident at the above-referenced facility. Based upon the submitted information and with the provision that the documentation provided to this agency was accurate and representative of site conditions, we concur with your conclusions and recommendations that the site has met the closure requirements. Therefore, no further corrective action is necessary. The justification for final closure includes, but is not limited to, the following criteria:

- maximum soil concentrations are above Plan A Category II levels, but below commercial/industrial health-based and construction worker target levels;
- groundwater concentrations exceed Plan A Category II levels; but the maximum concentrations are below construction worker target levels;
- groundwater plume is adequately assessed and delineated; and
- identified potential receptors do not appear threatened by this release.

Please note that financial assurance must be maintained for all operational storage tanks at this site. Please be aware that case closure is based on identified exposure pathways and that any remaining contaminant levels and potential exposure pathways should be evaluated when conducting any future soil excavation or construction activities at this site. Please ensure that any wastes generated from these activities are handled in compliance with all applicable regulations.

Please be advised that all monitor wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned pursuant to Chapter 32.017 of the Texas Water Code and in accordance with Title 16, Texas Administrative Code (TAC), Section 76.1004. A State of Texas Plugging Report (Form No. TCEQ-0055) is required to be submitted to the Water Well Drillers Section of the Texas Department of Licensing and Regulation, P.O. Box 12157, Capitol Station, Austin, Texas 78711, within thirty (30) days of plugging completion. If you have any questions regarding the future use of an existing monitor well, please contact the Texas Department of Licensing and Regulation at 512/463-7880 or 800/803-9202.

If any monitor well plugging or other necessary site restoration activities will be performed to complete site closure, complete a *Final Site Closure Report* and submit the report to the Central Office in Austin to document actual site closure. For sites eligible for reimbursement through the Petroleum Storage Tank

Remediation Fund, written preapproval should be obtained prior to initiation of site closure activities. Reimbursement claims for activities that are not preapproved will not be paid until all claims for preapproved work are processed and paid.

Please note that the *Final Site Closure Report*, if necessary, will be the last submittal associated with this case. This letter signifies the completion of corrective action associated with the release. No subsequent TCEQ correspondence will be issued in response to the *Final Site Closure Report*.

Should you have any questions, please contact David Bratberg of Darcy Environmental Group (TCEQ Privatization Contractor) at 512/342-8585, extension 28. **Please reference the LPST ID Number when making inquiries.** Your cooperation in this matter has been appreciated.

Updated: 09/29/04

THRU : Maria Lebron, TCEQ On Site Supervisor
David Bratberg, Project Manager, Darcy Environmental Group

FROM : David Bratberg, Case Coordinator, Darcy Environmental Group

SUBJECT : File Review of Subsurface Release of Hydrocarbons at the Former McQuillan Surveying, Inc. Facility, 2018 North Shepherd, Houston (Harris County), Texas (LPST ID 111825 - Facility ID 0068766 - Priority 4.1); R-12

Not eligible for reimbursement; USTs not registered by 12/31/95

Release Determination/Assessment History

- November 1998 - UST removal. 5 Soil borings installed in preparation of AIP of 2 5K, one 4K gasoline UST, and one 550 gallon WOT. SB-1 had 5.23 ppm benzene, 35.2 ppm BTEX, and 81 ppm TPH; LPST 111825 issued. SB-5, next to WOT <VOCs, TPH
- Confirmation boring of SB-1 had 1.47 ppm benzene. USTs AIP in 06/96.
- 2002-2003 - RBA. Total of 10 SBs installed; 3 MWs, 10 SBs installed to date.

Site Characteristics

- site is a former UST site; currently vacant; future use is expected to remain commercial
- site is 75-100% paved; former UST tankhold not paved.
- surrounding land use is commercial and residential

Exposure Pathways Open:

- ☐ GW Ingestion (onsite-current)
- ☐ GW Ingestion (onsite-- future)
- ☐ GW Ingestion (offsite - current)
- ☐ GW Ingestion (offsite - future)
- ☐ Construction Worker
- ☐ plume stability monitoring
- ☐ Soils- Exp. Vapor
- ☐ Soils - Health
- ☐ NAPL, DTW <15'
- ☐ GW to surface water
- ☐ Other _____

Soil Assessment

- 3 MWs, 10 SBs
- max. soil concentrations:
  0.018 ppm benzene (MW-1, 6-8'), by SB-1, SB-1A
  3.36 ppm BTEX (MW-1, 6-8')
  51.1 ppm TPH (MW-1, 6-8')
- PAH: NA
- there appears to be no threat of explosive vapors by sample or survey results.

Groundwater Assessment

- 3 MWs, wells properly screened.
- DTW: 8-9'
- GW gradient: southeast
- TDS: <3000 ppm assumed
- GWM events: 2002-2003 (1 to 3 events)

The following are the groundwater maximums detected

groundwater maximums:	Historical (2002-2003)	Latest (09/03)
benzene	5.23 ppm (MW-2, 09/03)	5.23 ppm (MW-2)
BTEX	9.22 ppm (MW-1, 12/02)	8.24 ppm (MW-2)
MTBE	ND ppm (all)	ND ppm (all)
TPH	20. ppm (MW-1, 11/02)	16.3 ppm (MW-1)

- PAH analyses: <Plan A

NAPL

- No NAPL detected.

Receptors and Site Priority/Category

- Site is located on silty clays of the Beaumont Formation, not part of a major/minor Aquifer.
- **0** water wells within ½-mile of the site; **0**within 1200'. Deep cemented wells in area.
- Surface water receptors within 1,200 feet: **none**
- Category II groundwater, Priority 4.1
- Water provided by: City
- underground utilities along street.

Plume Delineation Requirements

- soil: construction worker targets - soils are adequately assessed. **< defaults**
- GW Plume delineation requirement: - < construction worker **MET;** decreasing concentration w/ distance **Met-**

Receptor Pathways

- groundwater pathways:
  - Figure 1:
    - onsite current - **closed**
    - onsite future - **closed**
    - offsite current - **closed**
    - offsite future - **closed**
    - GW to surface water - **closed**
  - Figure 2: - **closed;**
- soil pathways Figure 3:
  - 1: closed - < health-based concentration for Comm/Ind sites
  - 2: closed - no explosive vapors - **closed**
  - 3: closed - plume is stable and concentrations are stable/decreasing - **closed**

Conclusions/Recommendations

Current Submittals: Tech Response requesting closure; RP is elderly, limited work done at non-reimbursable site. CARF for GWM for plume stability previously approved
Send fnn.

Pathway evaluation:

- maximum soil concentrations are above Plan A Category II levels, but below commercial/industrial health-based and construction worker target levels;
- groundwater concentrations exceed Plan A Category II levels; but the maximum concentrations are below construction worker target levels;
- groundwater plume is adequately assessed and delineated; and
- identified potential receptors do not appear threatened by this release.

Based on the above evaluation, site closure is recommended.

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Subsurface Release of Hydrocarbons at Former Walding Oil Facility, 1815 N. Durham, Houston (Harris County), Texas
(LPST ID No. 114439; Facility ID No. 022869; Priority 4.1; R-12)

Dear Mr. Pham:

This letter confirms the completion of corrective action requirements for the release incident at the above-referenced facility. Based upon the submitted information and with the provision that the documentation provided to this agency was accurate and representative of site conditions, the site has met closure requirements. Therefore, no further corrective action is necessary. The justification for final closure includes, but is not limited to, the following criteria:

- The release poses no apparent threats or impacts to receptors;
- No Non-Aqueous Phase Liquid (NAPL) has been reported at the site;
- Groundwater is deeper than 10 feet below ground surface; therefore, even if current or future groundwater contaminant concentrations exceed default target levels for construction worker exposure, the potential for exposure to that contamination is minimal;

Please note that financial assurance must be maintained for all operational storage tanks at this site. Please be aware that case closure is based on identified exposure pathways and that any remaining contaminant levels and potential exposure pathways should be evaluated when conducting any future soil excavation or construction activities at this site. Please ensure that any wastes generated from these activities are handled in compliance with all applicable regulations.

Please be advised that all monitor wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned pursuant to Chapter 32.017 of the Texas Water Code and in accordance with Title 16, Texas Administrative Code (TAC), Section 76.1004. A State of Texas Plugging Report (Form No. TCEQ-0055) is required to be submitted to the Water Well Drillers Section of the Texas Department of Licensing and Regulation, P.O. Box 12157, Capitol Station, Austin, Texas 78711, within thirty (30) days of plugging completion. If you have any questions regarding the future use of an existing monitor well, please contact the Texas Department of Licensing and Regulation at 512/463-7880 or 800/803-9202.

If any monitor well plugging or other necessary site restoration activities will be performed to complete site closure, complete a *Final Site Closure Report* and submit the report to the Central Office in Austin to document actual site closure. For sites eligible for reimbursement through the Petroleum Storage Tank Remediation Fund, written preapproval should be obtained prior to initiation of site closure activities.

Reimbursement claims for activities that are not preapproved will not be paid until all claims for preapproved work are processed and paid.

Please note that the *Final Site Closure Report*, if necessary, will be the last submittal associated with this case. This letter signifies the completion of corrective action associated with the release. No subsequent TCEQ correspondence will be issued in response to the *Final Site Closure Report*.

Should you have any questions, please contact Ms. Megan Bratberg of Darcy Environmental Group (TCEQ Privatization Contractor) at mbratber@tceq.state.tx.us or 512/342-8585, extension 27. **Please reference the LPST ID Number when making inquiries.** Your cooperation in this matter has been appreciated.

Leigh Morgan, Case Coordinator, AES-Regulatory Services, Inc.

SUBJECT : File Review For Closure of Subsurface Release of Hydrocarbons at the Phan Thai Van property, 1815 N Durham, Houston (Harris County), Texas
(LPST ID No. 114439 - Facility ID No. 0022869 - Priority 4.1) R-12

Release Determination

- January 1999 - removal of one 1,000-gallon kerosene UST
- Soil samples
  - benzene 0.85 ppm (east wall)
  - BTEX 6.67 ppm (east wall)
  - TPH bdl (all)
- Groundwater was not encountered.
- The final disposition of the excavated soil was not reported. Clean fill material was returned to the excavations. The tank was properly disposed.

Site Assessment

- Assessment activities indicated that the site lithology consists of clayey sand and clay.
- Assessment: one confirmation boring in the location of the former east wall
- Soil sample:
  - benzene 2.96 ppm (20')
  - BTEX 68.36 ppm (20')
  - TPH 220 ppm (20')
  - PAH BDL
- One groundwater sample was taken from the installation of this boring:
  - benzene 0.093 ppm
  - BTEX 0.33 ppm
  - TPH 3.6 ppm
- Depth to groundwater is not reported and there is no documentation of waste disposal.

Groundwater Assessment

- none
- Nearby LPST 109713 and LPST 113878 have groundwater gradients to the northeast
- Depth to water > 15' at the referenced LPST sites, supported by boring log from the subject site.

Site Description and Receptors

- It appears that the site was a retail fueling facility until 2005, when the tanks were registered as temporarily out of use.
- White Oak Bayou is located > 0.25 mi to the northeast
- Water well search located 6 wells between 0.25 mi and 0.5 mi:
  - 604: ps well, screened at 610', cementing unknown
  - 607, 614: unused ps wells, screened ≥ 514', cementing unknown
  - Three wells are destroyed

Exposure Pathway Evaluation

- Soil pathway: contaminant concentrations detected in soils from 0-15 ft bgs did not exceed health-based or default construction worker target concentrations - **closed**
- Onsite GW ingestion
  Current: no onsite wells, municipal water provided - **closed**
  Future: site expected to remain commercial and municipal water is provided - **closed**

- Offsite GW Ingestion
  Current: no water wells are present within 0.25 mile; wells located > 0.25 mi are screened in deep zones - **closed**
  Future: municipal supply, no evidence of local use of affected zone - **closed**
  Groundwater Plume Delineation: unnecessary

Conclusion

May 2008 Status Review:

- There appear to be no threatened receptors. Closure is warranted.
- Most recently, facility did not appear to be operated by RP. Closure letter to file only.

TCEQ Final Letter

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

RECEIVED
MAY 23 2017
TCEQ
CENTRAL FILE ROOM

May 8, 2017

Mr. Jihad Zeibak
Pecan Mill
P.O. Box 25443
Houston, TX 77265

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Hydrocarbon Contamination at the Houston Alternator, 1835 North Shepherd Drive, Houston, Harris County, Texas
Reference Number 100551365; Customer Number 600262323
LPST ID No. 119652 - Priority 4.1 - Facility ID No. 68347; R - 12

Dear Mr. Zeibak:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the corrective action information submitted in relation to the release incident at the above-referenced facility. Provided that the documentation was accurate and representative of site conditions, it appears that the closure requirements of Title 30, Texas Administrative Code (TAC), Chapter 334, (30 TAC 334)—and applicable program guidance—have been met. Therefore, the site meets the Petroleum Storage Tank (PST) Program closure requirements and no further corrective action is necessary.
The following criteria were part of the justification used for final closure:

- There is no documented beneficial use of the shallow impacted groundwater zone;
- Dissolved-phase concentrations are below the default target concentrations for construction worker exposure;
- The groundwater contaminant plume is stable/decreasing in size and concentrations; and
- Contaminant concentrations in soil are below health-based and explosive concentrations.

Please note that case closure is based on identified exposure pathways. Any contamination remaining at the site should be reevaluated if future soil excavation or construction activities are conducted. Please ensure that any wastes generated from such activities are handled in compliance with all applicable regulations.
All monitoring wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned in accordance with the requirements of the Texas Department of Licensing and Regulation (TDLR).

If monitor well plugging or other necessary site restoration activities will be performed to complete site closure, please prepare and submit a Final Site Closure Report form (TCEQ-0030) to document the activities and the actual closure of the site. The Final Site Closure Report, if necessary, will be the last required submittal for this case. This final concurrence letter signifies the completion of corrective action associated with the release. No subsequent TCEQ correspondence will be issued in response to the Final Site Closure Report.

Any new or existing underground or above-ground storage tanks remaining at this site continue to be subject to TCEQ tank registration, self-certification, financial assurance, and technical standards provisions.

Please reference the LPST and facility ID numbers on future correspondence regarding this site. Should you have any questions, please contact Morgan Suhm, the Project Manager, at (512) 239-2256. Your cooperation in this matter has been appreciated.

Sincerely,

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

RECEIVED
DEC 08 2016
TCEQ
CENTRAL FILE ROOM

November 21, 2016

Mr. Bryan Danna
1603 DT, LP
P.O Box 7600
Houston, TX 77270

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Hydrocarbon Contamination at the Former Car Wash, 1603 N. Durham, Houston, Harris County, Texas
Reference Number 109243709; Customer Number 605168277
LPST ID No. 120006 - Priority 4.1 - Facility ID No. 88530; R - 12

Dear Mr. Danna:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the corrective action information submitted in relation to the release incident at the above-referenced facility. Provided that the documentation was accurate and representative of site conditions, it appears that the closure requirements of Title 30, Texas Administrative Code (TAC), Chapter 334, (30 TAC 334)—and applicable program guidance—have been met. Therefore, the site meets the Petroleum Storage Tank (PST) Program closure requirements and no further corrective action is necessary.

The following criteria were part of the justification used for final closure:

- The underground storage tank (UST) system has been permanently removed from the site.
- There is no documented beneficial use of the shallow impacted groundwater zone.
- Dissolved-phase concentrations are below the default target concentrations for construction worker exposure.
- The groundwater contaminant plume is stable/decreasing in size and concentrations from source.
- Contaminant concentrations in soil are below health-based and explosive concentrations.

Please note that case closure is based on identified exposure pathways. Any contamination remaining at the site should be reevaluated if future soil excavation or construction activities are conducted. Please ensure that any wastes generated from such activities are handled in compliance with all applicable regulations.

All monitoring wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned in accordance with the requirements of the Texas Department of Licensing and Regulation (TDLR).

If monitor well plugging or other necessary site restoration activities will be performed to complete site closure, please prepare and submit a Final Site Closure Report form (TCEQ-0030) to document the activities and the actual closure of the site. The Final Site Closure Report, if necessary, will be the last required submittal for this case. This final concurrence letter signifies the completion of corrective action associated with the release. No subsequent TCEQ correspondence will be issued in response to the Final Site Closure Report.

Any new or existing underground or above-ground storage tanks remaining at this site continue to be subject to TCEQ tank registration, self-certification, financial assurance, and technical standards provisions.

Please reference the LPST and facility ID numbers on future correspondence regarding this site. Should you have any questions, please contact Bria Patterson the Project Manager, at (512) 239-2103 or via email at Bria.Patterson@tceq.texas.gov. Your cooperation in this matter has been appreciated.

UST Facility No. 12668
LPST No. 100344

Dear Mr. Harvey:

On November 25, 1991, the Texas Water Commission (TWC) received a closure report from U.S.T. Environmentalist, Incorporated for an underground storage tank removal at the above-referenced facility. Based on the closure report and other currently available information, we conclude that no further remedial activities are necessary at this time.

If you have questions or require further guidance, please contact Robert Burrell at 713/457-5191.

I. REPORT SUMMARY

On September 16, 1991, the underground storage tank system was removed. Upon investigation of the site, no holes were found in the 4,000 gallon UST. The pump island appeared to be clean. The piping appeared to have some contamination in the pipe trench area. The pump island and piping trench were over-excavated into the one tank cavity. Samples were taken and submitted to an approved laboratory. All soil was replaced in the tank cavity until sample results were received.

On September 24, sample results were received and showed high levels of TPH in the tank cavity. On September 30, 1991 the sample results were reviewed with Jo English of District 7, Texas Water Commission. After review, on October 5, over-excavation was performed of approximately 3-5 feet . The soil was placed on plastic and burmed for aeration. Samples were again taken and submitted to an approved lab for analysis. On October 10, samples results were received showing contamination under 20 TPH in the tank cavity. On October 20, soil was aerated with a front-end loader and backfill samples were taken and submitted to lab. On October 22, backfill sample results showed under 20 TPH. After reviewing these samples results with Jo English, approval was given for soil to be replaced in tank cavity and tamped for compaction.

II. CHRONOLOGY OF EVENTS

September 16, 1991: Underground Storage Tank System removed

October 5, 1991: Over-excavation of Tank Cavity

October 24, 1991: Soil replaced to Tank Cavity and Site closed.

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Subsurface Release of Hydrocarbons at Tommy Vaughn Motors, 1145 N. Shepherd, Houston (Harris County), Texas
(LPST ID No. 095686 - Facility ID No. 0012436 - Priority 4.2) R-12

Dear Mr. Blair:

This letter confirms the completion of corrective action requirements for the release incident at the above-referenced facility. Based upon the submitted information and with the provision that the documentation provided to this agency was accurate and representative of site conditions, we concur with your recommendation that the site has met closure requirements. This letter documents that no further corrective action is necessary.

Please note that financial assurance must be maintained for all operational storage tanks at this site. Please be aware that case closure is based on identified exposure pathways and that any remaining contaminant levels and potential exposure pathways should be evaluated when conducting any future soil excavation or construction activities at this site. Please ensure that any wastes generated from these activities are handled in compliance with all applicable regulations.

Please be advised that all monitor wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned pursuant to Chapter 32.017 of the Texas Water Code and in accordance with Title Title 16, Texas Administrative Code (TAC), Section 76.1004. A State of Texas Plugging Report (Form No. TNRCC-0055) is required to be submitted to the Water Well Drillers Section of the Texas Department of Licensing and Regulation, P.O. Box 12157, Capitol Station, Austin, Texas 78711, within thirty (30) days of plugging completion. If you have any questions regarding the future use of an existing monitor well, please contact the Texas Department of Licensing and Regulation at 512/463-7880 or 800/803-9202.

If there are to be any other necessary site restoration activities performed to complete site closure, complete a *Final Site Closure Report* and submit the report to the Texas Natural Resource Conservation Commission (TNRCC) Central Office in Austin to document actual site closure. For sites eligible for reimbursement through the Petroleum Storage Tank Remediation Fund, written preapproval should be obtained prior to initiation of site closure activities. Reimbursement claims for activities that are not preapproved will not be paid until all claims for preapproved work are processed and paid.

Please note that the *Final Site Closure Report*, if necessary, will be the last submittal associated with this case. This letter signifies the completion of corrective action associated with the release. No subsequent TNRCC correspondence will be issued in response to the *Final Site Closure Report*.

Please note that all correspondence must include the LPST and Facility ID Numbers and must be submitted to the TNRCC Central Office in Austin.

Should you have any questions, please contact Leigh Morgan of AES Regulatory Services, Inc (PST Privatization Contractor) at 512/990-7467. **Please reference this LPST ID Number when making inquiries.** Your cooperation in this matter has been appreciated.

Sincerely,

for Dennis Rogers

Texas Natural Resource Conservation Commission
INTEROFFICE MEMORANDUM

TO : FILE DATE: 1/24/2002

THRU : Dennis Rogers, TNRCC Onsite Representative
Veronica Fuentes, Project Manager, AES Regulatory Services, Inc.

FROM : Leigh Morgan, Case Coordinator, AES Regulatory Services, Inc.

SUBJECT : File Review of Subsurface Release of Hydrocarbons at
Tommy Vaughn Motors, 1145 N. Shepherd, Houston (Harris County), Texas
(LPST ID No. 095686 - Facility ID No. 00124436 - Priority 4.2) R-12

In December 1989, a release of hydrocarbons form the above-referenced facility was reported to the TWC subsequent to the completion of tank removal activities. Soil samples were taken after the removal of two-2,000 gallon USTs which detected maximum soil BTEX and TPH concentrations of BDL and 143.4 ppm (below fill pipe), respectively. The tankhold was completed to the surface with clean backfill and then covered with cement. There is no documentation of waste disposal.

This site is currently a car dealership. The surrounding land use is mixed residential and commercial. The site is reported to have a 75-100% impervious cover.

After tank removal was completed, the tankhold was overexcavated three times in an effort to rid the tankhold of COCs. Final maximum detected soil BTEX and TPH concentrations were BDL and 84.1 ppm (middle of bottom of the tankhold), respectively. Additional assessment was conducted in January 1990. Assessment work to date has included the installation of one monitor well and three soil borings. The maximum detected soil BTEX and TPH concentrations were BDL and 28.3 ppm (west soil boring), respectively. PAH analysis was not conducted.

One groundwater monitoring event was conducted in January 1999. Samples exhibited TPH concentrations of BDL. PAH analysis was not conducted. PSH was not reported.

The depth to groundwater is reported as being 33' below the ground surface.

Site closure is recommended at this time based on BTEX and TPH concentrations below Plan A Category I target levels. Therefore, no further corrective action is necessary and a letter of final concurrence should be issued to the RP.

Call to: Robin Shaver

Date of call: 9/20/12

Phone no.: (646) 344-8770

Call from: Daren Mos w/ Bricks More Property

File no.: 118887

Subject: NFA / Closure letter dated 9/18/12

Information for file: Mr. Mos represents a company that plans to make improvements to the property at the subject LPST sites. Although the RP has received a NFA letter, he still had concerns of what may be left there. I explained that a 4.1 site priority (aside from a 4.0 - soils only contaminated) was the lowest priority a (GW) case could receive, hence, indicating very little, if any risk. I also explained that my 1st draft of the closure letter included site-specific detail which should support the low to no risk contention; however, upon peer review they were eliminated to mirror the typical generic language that goes to all RPs with a 4.1 priority. Accordingly, I read him the site specific bullets of info. (attached hereto) that had been included in the original draft & he seemed more satisfied re: the actual low risk of this site. In addition we spoke of sites where institutional controls (IC) like deed recordations have to be done, but this low site/priority does not require an IC.

Signed Roli Shaver

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Hydrocarbon Contamination at Valero Corner Store #2474, 1421 West 11th St. Houston (Harris County), Texas
Reference Number 102365913; Customer Number 603359126
LPST ID No. 118887; Facility ID No. 35308; Priority 4.1; R - 12

Dear *Mr. Trinkle*:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the corrective action information submitted in relation to the release incident at the above-referenced facility. Provided that the documentation was accurate and representative of site conditions, it appears that the closure requirements of Title 30, Texas Administrative Code, Chapter 334 (30 TAC 334)—and applicable program guidance—have been met. Therefore, we concur that the site meets the Petroleum Storage Tank (PST) Program closure requirements and that no further corrective action is necessary.

The following criteria were part of the justification used for final closure: site specific info.

- Three (3) 10,000 gallon underground storage tanks, associated piping, and dispensers were removed in March, 2012;
- Soil excavation activities removed 712 cubic yards of soil and remaining soil concentrations are less than Category II target clean-up levels with virtually all data being non detect;
- *Based on no phase separated hydrocarbons (PSH) present and low soil concentrations, no threat of explosive vapors;*
- *No water wells identified within a half mile radius of site, and no sensitive receptors identified within 500'; and,*

(over)

- *The groundwater contaminant plume has been delineated to Category II beneficial use clean-up target levels and data indicate decreasing concentrations from the source.*

Please note that case closure is based on identified exposure pathways. Any contamination remaining at the site should be reevaluated if future soil excavation or construction activities are conducted. Please ensure that any wastes generated from such activities are handled in compliance with all applicable regulations.

Be aware that all monitoring wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned in accordance with the requirements of the Texas Department of Licensing and Regulation (TDLR). Contact TDLR at 512/ 463-6599 or 800/803-9202 (toll free in Texas), or visit their website located at **www.license.state.tx.us** for more information.

If monitor well plugging or other necessary site restoration activities will be performed to complete site closure, please prepare and submit a *Final Site Closure Report* form (TCEQ-0030) to document the activities and the actual closure of the site. The *Final Site Closure Report*, if necessary, will be the last required submittal for this case. This final concurrence letter signifies the completion of corrective action associated with the release. No subsequent TCEQ correspondence will be issued in response to the *Final Site Closure Report.*

Be aware that any new or existing underground or above-ground storage tanks remaining at this site continue to be subject to TCEQ tank registration, self-certification, financial assurance and technical standards provisions. See **www.tceq.texas.gov/nav/permits/pst_cert.html** or call 512/239-2182 for more information.

Please reference the LPST and facility ID numbers on any future correspondence regarding this site. Should you have any questions, please contact Ms. Robin Shaver, the project manager, at 512/239-2140. Your cooperation in this matter is appreciated.

Sincerely,

Don Boothby, P.G.

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Hydrocarbon Contamination at Valero Corner Store #2474, 1421 West 11th St. Houston (Harris County), Texas
Reference Number 102365913; Customer Number 603359126
LPST ID No. 118887; Facility ID No. 35308; Priority 4.1; R - 12

Dear Mr. Trinkle:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the corrective action information submitted in relation to the release incident at the above-referenced facility. Provided that the documentation was accurate and representative of site conditions, it appears that the closure requirements of Title 30, Texas Administrative Code, Chapter 334 (30 TAC 334)—and applicable program guidance—have been met. Therefore, we concur that the site meets the Petroleum Storage Tank (PST) Program closure requirements and that no further corrective action is necessary.

The following criteria were part of the justification used for final closure:

- the maximum soil concentrations are below health-based and construction worker target levels;
- the maximum dissolved phase concentrations are below default construction worker target levels; and,
- the dissolved-phase plume is adequately delineated and stable.

Please note that case closure is based on identified exposure pathways. Any contamination remaining at the site should be reevaluated if future soil excavation or construction activities are conducted. Please ensure that any wastes generated from such activities are handled in compliance with all applicable regulations.

Be aware that all monitoring wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned in accordance with the requirements of the Texas Department of Licensing and Regulation (TDLR). Contact TDLR at 512/ 463-6599 or 800/803-9202 (toll free in Texas), or visit their website located at **www.license.state.tx.us** for more information.

If monitor well plugging or other necessary site restoration activities will be performed to complete site closure, please prepare and submit a *Final Site Closure Report* form (TCEQ-0030) to document the activities and the actual closure of the site. The *Final Site Closure Report*, if necessary, will be the last required submittal for this case. This final concurrence letter signifies the completion of corrective action associated with the release. No subsequent TCEQ correspondence will be issued in response to the *Final Site Closure Report*.

Be aware that any new or existing underground or above-ground storage tanks remaining at this site continue to be subject to TCEQ tank registration, self-certification, financial assurance and technical standards provisions. See **www.tceq.texas.gov/nav/permits/pst_cert.html** or call 512/239-2182 for more information.

Please reference the LPST and facility ID numbers on any future correspondence regarding this site. Should you have any questions, please contact Ms. Robin Shaver, the project manager, at 512/239-2140. Your cooperation in this matter is appreciated.

LPST ID No. 107211

Dear Mr. Kim:

On August 30, 1993, the Texas Natural Resource Conservation Commission (TNRCC), formerly the Texas Water Commission (TWC) received soil sample analyses from Coastal Environmental Services obtained during the underground petroleum storage tank system upgrade activities conducted at the above-referenced facility. Two soil samples collected from the product piping trench excavation exhibit levels of total petroleum hydrocarbons (TPH) and benzene above current TNRCC limits for native soils. However, based on the soil analyses and other currently available information, we conclude that no further remedial activities are necessary at this time.

If you have questions or require further guidance, please contact Johnny Kennedy at 713/457-5191.

Sincerely,

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Subsurface Release of Hydrocarbons at E. T. Texaco, 1049 North Shepherd, Houston (Harris County), Texas
(LPST ID No. 112625; Priority 2.2; Facility ID No. 0016738); R - 12

Dear Mr. Kim:

This letter confirms the completion of corrective action requirements for the release incident at the above-referenced facility. Based upon the submitted information and with the provision that the documentation provided to this agency was accurate and representative of site conditions, we concur with your conclusions and recommendations that the site has met the closure requirements. Therefore, no further corrective action is necessary. The justification for final closure includes, but is not limited to, the following criteria:

- The maximum soil contaminant concentrations observed within the typical construction zone of less than 15 feet below ground surface were below health-based target levels and default construction worker exposure target levels.
- There appears to be no threat of explosive vapors at this site. Vapors in utility lines were remediated via repairs and impacted soil disposal.
- There is no documented beneficial use of the affected groundwater zone within ½ mile of the site and the site is provided with municipal water.
- Identified potential receptors do not appear threatened by this release.

Please note that financial assurance must be maintained for all operational storage tanks at this site. Please be aware that case closure is based on identified exposure pathways and that any remaining contaminant levels and potential exposure pathways should be evaluated when conducting any future soil excavation or construction activities at this site. Please ensure that any wastes generated from these activities are handled in compliance with all applicable regulations.

Please be advised that all monitor wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned pursuant to Chapter 32.017 of the Texas Water Code and in accordance with Title 16, Texas Administrative Code (TAC), Section 76.1004. A State of Texas Plugging Report (Form No. TCEQ-0055) is required to be submitted to the Water Well Drillers Section of the Texas Department of Licensing and Regulation, P.O. Box 12157, Capitol Station, Austin, Texas 78711, within thirty

(30) days of plugging completion. If you have any questions regarding the future use of an existing monitor well, please contact the Texas Department of Licensing and Regulation at 512/463-7880 or 800/803-9202.

If any monitor well plugging or other necessary site restoration activities will be performed to complete site closure, complete a *Final Site Closure Report* and submit the report to the Central Office in Austin to document actual site closure. For sites eligible for reimbursement through the Petroleum Storage Tank Remediation Fund, written preapproval should be obtained prior to initiation of site closure activities. Reimbursement claims for activities that are not preapproved will not be paid until all claims for preapproved work are processed and paid.

Please note that the *Final Site Closure Report*, if necessary, will be the last submittal associated with this case. This letter signifies the completion of corrective action associated with the release. No subsequent TCEQ correspondence will be issued in response to the *Final Site Closure Report.*

Should you have any questions, please contact Michael L'Heureux of Darcy Environmental Group (TCEQ Privatization Contractor) at 512/342-8585, extension 23. **Please reference the LPST ID Number when making inquiries.** Your cooperation in this matter has been appreciated.

Houston, Texas 77022

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Subsurface Release of Hydrocarbons at Tommie Vaughn Ford, 914 N. Shepherd, Houston (Harris County), Texas
(LPST ID No. 114431 - Facility ID No. 059554 - Site Priority 4.1) R-12

Dear Mr. Blair:

This letter confirms the completion of corrective action requirements for the release incident at the above-referenced facility. Based upon the submitted information and with the provision that the documentation provided to this agency was accurate and representative of site conditions, we conclude that the site meets the exit criteria established in the Interoffice Memorandum entitled, *Process for Closure Evaluation for Petroleum Hydrocarbon LPST Sites Exceeding Target Concentrations*. Therefore, no further corrective action is necessary. The criteria includes, but are not limited to the following:

- adsorbed-phase impacts have been adequately delineated and do not exceed commercial health-based target levels;
- adsorbed-phase impacts do not exceed theoretical explosive limits;
- the dissolved-phase plume has been delineated to MCLs; and
- identified possible receptors do not appear threatened.

Please note that financial assurance must be maintained for all operational storage tanks at this site. Please be aware that case closure is based on identified exposure pathways and that any remaining contaminant levels and potential exposure pathways should be evaluated when conducting any future soil excavation or construction activities at this site. Please ensure that any wastes generated from these activities are handled in compliance with all applicable regulations.

Please be advised that all monitor wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned pursuant to Chapter 32.017 of the Texas Water Code and in accordance with Title 16, Texas Administrative Code (TAC), Section 76.1004. A State of Texas Plugging Report (Form No. TNRCC-0055) is required to be submitted to the Water Well Drillers Section of the Texas Department of Licensing and Regulation, P.O. Box 12157, Capitol Station, Austin, Texas 78711, within thirty (30) days of plugging completion. If you have any questions regarding the future use of an existing monitor well, please contact the Texas Department of Licensing and Regulation at 512/463-7880 or 800/803-9202.

If there are to be any monitor well plugging or other necessary site restoration activities to complete site closure, complete a *Final Site Closure Report* and submit the report to the TNRCC Central Office in Austin to document actual site closure. For sites which are eligible for reimbursement through the Petroleum Storage Tank Remediation Fund, written preapproval should be obtained prior to initiation of site closure activities. Reimbursement claims for activities that are not preapproved will not be paid until all claims for preapproved work are processed and paid.

Please note that the *Final Site Closure Report*, if necessary, will be the last submittal associated with this case. This letter signifies the completion of corrective action associated with the release. No subsequent TNRCC correspondence will be issued in response to the *Final Site Closure Report*.

Please note that all correspondence must include the LPST ID Number. Should you have any questions, please contact Shelia Ward of AES-Regulatory Services, Inc. (PST Privatization Contractor) at (512) 990-7467, extension 218. **Please reference the LPST ID Number when making inquiries.** Your cooperation in this matter has been appreciated.

Sincerely,

B.V.D. Prasanthi

INTEROFFICE MEMORANDUM

TO : FILE DATE: 11/4/02

THRU : Dennis Rogers, TNRCC Onsite Representative
Christopher Kopec, Project Manager, AES-Regulatory Services, Inc.

FROM : Shelia Ward, Case Coordinator, AES-Regulatory Services, Inc.

SUBJECT : File Review For Closure of Subsurface Release of Hydrocarbons at Tommie Vaughn Ford, 914 N. Shepherd, Houston (Harris County), Texas (LPST ID No. 114431 - Facility ID No. 059554 - Site Priority 4.1) R-12

THIS SITE IS NOT REIMBURSABLE

Release Determination

In January 1999 a release of hydrocarbons from the above-referenced facility was reported to the TNRCC subsequent to tank removal activities. In January 1999 one 2,000 gallon gasoline UST was removed from service and a 6,000 gallon gasoline/diesel split compartment AST was put into service. Soil samples collected after over-excavation exhibited maximum soil benzene, BTEX and TPH concentrations of 0.96 ppm (east wall), 45.48 ppm (east wall), and 1891 ppm (south wall) respectively. Further excavation of the south wall was not possible as that area provided the foundation for the new AST. Excavated soils were disposed of properly and the excavated area was filled with clean material. The surface was completed with an impervious cover.

Site Characteristics

The site is currently a retail automotive sales lot with an AST onsite. The surrounding land use is mixed residential and commercial. The potential future use of the site is to remain commercial property. The site is reported to have 75-100% impervious cover. Assessment work completed to date indicates that the site lithology consists of sand, and clay of the Beaumont Formation overlying the Gulf Coast Aquifer.

Soil Assessment

A Plan A Assessment was conducted in April 2000. Assessment work to date has included the installation of nine soil borings, three of which were subsequently completed as monitor wells. Soil samples collected for analysis detected maximum benzene, BTEX and TPH concentrations of 0.985 ppm (MW-1, 5'-7.5'), 28.7 ppm (MW-1, 5'-7.5') and 293 ppm (MW-1, 5'-7.5'), respectively. PAH analysis revealed concentrations below Plan A Target Levels. MW-1 is located adjacent to the northeast of the former tankhold. Benzene was detected in only one other boring, SB-4, approximately 10' south of MW-1. Soil wastes generated during assessment activities were disposed of properly. There does not appear to be an explosive vapor hazard. Maximum adsorbed-phase impacts are protective of Plan A health-based target levels and construction worker exposure.

Groundwater Assessment

Five groundwater monitoring events were conducted between February 2000 and November 2001. The maximum benzene, BTEX, and TPH concentrations detected during the monitoring period were 3.75 ppm (MW-1, 7/9/01), 9.08 ppm (MW-1, 7/9/01), and 20.9 ppm (MW-1, 7/9/01), respectively. The maximum MTBE detected was 0.879 ppm (MW-1, 7/9/01). PAH analysis was not conducted. All other monitor wells have exhibited concentrations below MCLs during all sampling events. MW-1 is located in the inferred upgradient direction of groundwater flow from the dispenser islands and the tank basin. PSH was not reported. Fluid wastes have been properly disposed. The dissolved-phase plume has been delineated in the downgradient direction to MCLs. The only groundwater pathway at this site is the potential construction worker exposure to dissolved-phase hydrocarbons and maximum dissolved-phase concentrations do not exceed the default construction worker target levels.

Groundwater Characteristics

Depth to groundwater has varied from approximately 16 to 21 feet below the top of casing, and the groundwater gradient has generally been to the southwest. All wells are screened appropriately to have intersected the static water table.

Receptors and Site Priority/Category

A water well inventory search identified no water wells within one-half mile of the site. Other potential receptors include a storm drain and a sanitary sewer approximately 240' northeast and 170' east of the affected zone, respectively. White Oak Bayou is located approximately 0.4 mile southeast of the site. The site does not overlie, nor is the affected zone classified as a producing formation of a State designated major or minor aquifer. Based on the lack of groundwater ingestion receptors, we conclude that the appropriate site priority is 4.1. Based upon an assumed TDS concentration of <3,000 ppm and no documented use of the affected groundwater zone within one-half mile of the site, the appropriate beneficial use category for this site is Category II. The City of Houston provides municipal water to the site and site vicinity from surface water sources.

Conclusions/Recommendations

Site closure is recommended at this time based on the following criteria:

- adsorbed-phase impacts have been adequately delineated and do not exceed commercial health-based target levels;
- adsorbed-phase impacts do not exceed theoretical explosive limits;
- the dissolved-phase plume has been delineated to MCLs; and
- identified possible receptors do not appear threatened.

Therefore, no further corrective action is required and a letter of final concurrence should be sent to the RP.

Mr. Diran Elsaifi
PO Box 42224
Houston, Texas 77242

Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Subsurface Release of Hydrocarbons at Dons's Texaco, 2015 Shepherd Dr., Houston, (Harris County), Texas
(LPST ID No. 115032; Priority 4.1; Facility ID No. 59539); R-12

Dear Mr. Elsaifi:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the corrective action information submitted in relation to the release incident at the above-referenced facility. Provided that the documentation was accurate and representative of site conditions, it appears that the closure requirements of Title 30, Texas Administrative Code, Chapter 334 (30 TAC 334)—and applicable program guidance—have been met. Therefore, we concur that the site meets the Petroleum Storage Tank (PST) Program closure requirements and that no further corrective action is necessary.

The following criteria were part of the justification used for final closure:

- maximum soil concentrations do not exceed health-based target levels;
- NAPL has been recovered to the maximum extent practicable;
- although groundwater concentrations are above Plan A Category II levels, the maximum concentrations do not exceed default construction worker target levels;
- the groundwater plume appears to be adequately delineated to potential receptors and to decreasing concentrations from the source;
- the groundwater plume appears to be stable and/or declining in concentration; and
- identified potential receptors do not appear threatened by this release.

Please note that case closure is based on identified exposure pathways. Any contamination remaining at the site should be reevaluated if future soil excavation or construction activities are conducted. Please ensure that any wastes generated from such activities are handled in compliance with all applicable regulations.

Be aware that all monitoring wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned in accordance with the requirements of the Texas Department of

Licensing and Regulation (TDLR). Contact TDLR at 512/ 463-6599 or 800/803-9202 (toll free in Texas), or visit their website located at **www.license.state.tx.us** for more information.

If monitor well plugging or other necessary site restoration activities will be performed to complete site closure, please prepare and submit a *Final Site Closure Report* form (TCEQ-0030) to document the activities and the actual closure of the site. The *Final Site Closure Report*, if necessary, will be the last required submittal for this case. This final concurrence letter signifies the completion of corrective action associated with the release. No subsequent TCEQ correspondence will be issued in response to the *Final Site Closure Report*.

Be aware that any new or existing underground or above-ground storage tanks remaining at this site continue to be subject to TCEQ tank registration, self-certification, financial assurance and technical standards provisions. See **www.tceq.state.tx.us/nav/permits/pst_cert.html** or call 512/239-2182 for more information.

Should you have any questions, please contact Mr. David Bratberg of Darcy Environmental Group (TCEQ Privatization Contractor) at 512/342-8585, extension 203. **Please reference the LPST ID Number when making inquiries.** Your cooperation in this matter has been appreciated.

TPH (DRO):	20.2 (MW-1, 05/04/01)	NA
PAH:	NA	

Liquid waste disposal: All waste manifests ok

NAPL

Historic: MW-6 (3.85' 03/04)
Recovery: 3 gal recovered w/ passive skimmers (TCEQ stated inefficient); 1.85 gal recovered in 2010 w/ skimmer in MW-6, 4.85 gal total
Current: 08/03/10: (MW-6, 0.00') none since 02/22/10

Receptors and Site Priority/Category

- Lithology: clays overlying the Beaumont Formation
- Aquifer: Overlying Gulf Coast
- Water Wells: 2 wells have been identified within 0.5-mile; 0 within 1/4 mile, 0 within 500'. Both are unused, ~558' TD and cemented.
- Groundwater Category: II
- Priority 4.1
- Water Supply: City of Houston
- Surface water w/in 1,200 feet: White Oak Bayou ~400' North of site; has been eliminated as potential receptor by previous PMs,
- Delineation Scenario: Delineation to decreasing concentrations with distance -

Pathway evaluation:

- maximum soil concentrations do not exceed health-based target levels;
- NAPL has been recovered to the maximum extent practicable;
- although groundwater concentrations are above Plan A Category II levels, the maximum concentrations do not exceed default construction worker target levels;
- the groundwater plume appears to be adequately delineated to potential receptors and to decreasing concentrations from the source;
- the groundwater plume appears to be stable and/or declining in concentration; and
- identified potential receptors do not appear threatened by this release.

Current submittal:

05/04/09: status. Call from Rick Walton (281/ 513-1772, fax 832/ 698-2900) working for landowner who is not RP but stuck w/ property). Reviewed case, developed CFM. Site is Priority 4.1, Cat II, may need to adjust based on White Oak Bayou. No responses since January 2006, called SCS consultants (Scott Stephens), no activity due to client. Send OD.

09/16/09: PA8, PA19. Approve 4Q GWM, approve 3 months of bi-weekly recovery, will need to propose MDPE if NAPL remains.

06/07/10: PRR. Skimmer in MW-6, recovered 1.85 gal NAPL, with monthly check. Ok w/ fax, request results of GWM approved in 10/05/09 GWM CARF.

09/01/10: AGWMR, PA8. 11/09, 02/10, 05/10, & 08/03/10 GWM events. No NAPL last two events, plume stable, ok to close, send fnn

Comments/Notes

This suspected PST release entered the Voluntary Cleanup Program (VCP) under VCP No. 2552. A Site Closure Request Form (TCEQ-0028) was submitted. An Assessment Report Form (TCEQ-0562) for the site has been requested to further assess the PST issues onsite. Two historic gas stations were present onsite near monitor well MW-2 and monitor well MW-4. Current soil and groundwater assessment demonstrate no soil exceedances above action levels but groundwater exceedances above action levels. Benzene has been detected in monitor well MW-4 near a historic service station at a maximum concentration of 0.69 mg/L. Both service stations are no longer present and no former tanks have been reported found or removed.

<<< TCEQ USE ONLY >>> **PM**: complete this form when a PST release is reported to TCEQ, and provide to Admin Staff for LPST number assignment. Initial here to assign new LPST no.: ____ PM ____ TL/2nd Reviewer. **ADMIN** - fax completed form to RP & enter into appropriate databases. **NEW LPST ID#:** ____ Priority Code: ____ Region No.: ____ County Code: ____

III. RELEASE ABATEMENT/REMEDIATION, continued

f not already provided in *Release Determination Report Form* (TCEQ-0621), or if the information has changed ince submittal of the *Release Determination Report*, indicate number of tanks currently and formerly located at his site (attach pages as necessary):

	Type UST/AST	Product Type	Size (gal.)	
Current:				
None				
Former:	Type UST/AST	Product Type	Size (gal.)	Date Removed From Service
Unknown				

If the tanks were permanently removed from service, were native soil samples collected from beneath the tanks **and** the entire length of the piping? If No, explain why not: The site is associated with a historical gas station. No information is available for the location of tanks or dispenser islands.	☐ Yes ☒ No
Was a new UST system installed? If Yes, indicate the date, number of tanks and their contents:	☐ Yes ☒ No
Are there any open excavations at the site? If Yes, state size, location, purpose, and status for each of the excavations:	☐ Yes ☒ No

Type(s) of soil remediation and time periods the remediation method was operational (indicate all that apply):"

☐ Excavation ☐ Soil Vapor Extraction ☐ In-Situ Bioremediation ☐ Disposal ☐ Aboveground Bioremediation/Aeration ☐ Thermal Treatment ☒ None	Dates of operations: Some soil remediation was conducted on the site, but it was not associated with the historical gas station site.

IV. SOIL DATA VALIDATION

Are there now affected surface soils (contamination exceeding health-based target concentrations) present within 2 feet below the ground surface?	☐ Yes ☒ No ☐ Unknown
Type of surface cover over affected surface soil area:	☐ Paved (☐ asphalt or ☐ concrete) Percent of affected soils covered? ☐ Unpaved ☒ Other-Soon to be paved during construction
Is there public access to the uncovered affected surface soil area?	☐ Yes ☒ No
Total number of borings: (including those completed as monitor wells)	30
Was the vertical and horizontal extent of soil impacts defined (to the more stringent of health-based target or groundwater protective soil concentrations horizontally and to groundwater or nondetect vertically) by the borings?	☒ Yes ☐ No
Are shallow (0-15 feet below ground surface) soils affected (contaminant levels exceed health-based target concentrations) on adjacent properties (including right-of-way properties).	☐ Yes ☒ No
Were all soil sample collection, handling, transport, and analytical procedures conducted in accordance with TCEQ and EPA requirements?	☒ Yes ☐ No
If No, provide justification:	

MAXIMUM SOIL CONCENTRATION LEVELS

Soil Contaminants	Sample Date	Sample Location	Depth (ft.)	Analytical Method	Maximum Concentration (mg/kg)	Target Cleanup Goals
Benzene	5/27/10	MW-2	18-20		0.003 J	6.40
Toluene	5/27/10	MW-2	0-2		0.006	163
Ethylbenzene	5/27/10	MW-2	18-20		0.573	88.8
Total Xylenes	5/27/10	MW-2	18-20		1.22	117
BTEX						
TPH	5/28/10	SB-10	0-2	TX 1005	387	
Other						

Enter maximum soil analytical results for soils remaining beneath the site (take into account all available data, including information obtained during the release determination (tank removal from service, minimal site assessment, etc)).

If Plan A cleanup goals were used, provide the potential groundwater beneficial use category and a justification of how it was determined in Section VI.

V. GROUNDWATER DATA VALIDATION continued	
Has surface water been affected?	☐Yes ☒No
Will the groundwater contaminants likely discharge to a surface water body?	☐Yes ☒No
What is the potential impact of affected groundwater discharge on surface water?	☐ Current impact "☒ Discharges within 500 ft." ☐ Discharges within 500 to 0.25 miles ☐ No potential impact
Were groundwater sample collection, handling, transport, and analytical procedures conducted and documented in accordance with TCEQ requirements?:	☒Yes ☐No
If no, provide justification	
Is the extent of groundwater contamination defined (to MCL concentrations)? If No, provide justification for not defining the plume: Downgradient is concrete lined ditch and benzene is below the Cat III Groundwater Plan A Target Concentrations	☐Yes ☒No
Have groundwater impacts from this release been detected on adjacent properties?	☐Yes ☒No
If No, is off-site migration probable?	☒Yes ☐No
Is there documentation that off-site migration has **not** occurred (sample results from off-site sampling point)? "	☐Yes ☒No
Was the static groundwater level above the top of the well screen in any monitor wells during any of the last 4 monitoring events? Yes, in MW-5, but it has always been non-detect and is not a concern.	☒Yes ☐No
If Yes, provide a statement of validity regarding these samples:	
Have groundwater samples from all monitor wells met the target cleanup goals for the last four consecutive sampling events	☒Yes ☐No

MAXIMUM GROUNDWATER CONCENTRATIONS, (From the most recent 12 months.)

Groundwater Contaminants	Sample Date	Sample Location	Laboratory Method	Maximum (mg/l) Concentration	Target Cleanup Goals
Benzene	9/18/12	MW-4	8260	0.69	0.27 mg/L
Toluene	9/18/12	MW-4	8260	0.058	4.17 mg/L
Ethylbenzene	9/18/12	MW-4	8260	0.65	5.21 mg/L
Xylenes	9/18/12	MW-4	8260	1.4	10.4 mg/L

EXECUTIVE SUMMARY

The designated property (the Site) consists of an approximate 9.293-acre tract of land along White Oak Bayou from Shepherd Drive to Patterson Street. The Site is undeveloped and improvements to the Site are limited to re-channelization and improvements to White Oak Bayou. The Site is bordered to the north by commercial/industrial development. The Site is bordered to the east by residential development and vacant property followed by Patterson Street with commercial/industrial developments beyond. The Site is bordered to the south by residential development, industrial development and vacant land followed by Cornish Street. The Site is bordered to the west by Shepherd Drive followed by commercial/industrial development. The Site is currently heavily vegetated, with the exception of the improved White Oak Bayou Channel. The general Site vicinity consists of commercial/industrial, undeveloped, and residential properties.

Based on review of historical aerial photos, dating back to 1930, the Site has never been developed. The Site was historically the location of an oxbow of White Oak Bayou, which was cut off and filled in the 1950's when White Oak Bayou was re-channelized into its current position in 1956.

The results of previous site assessment activities indicate that surface soils within the boundaries of the Site have been impacted by arsenic, barium, cadmium, lead, mercury and silver at concentrations which exceed applicable critical TCEQ TRRP PCLs for leaching of contaminants to groundwater ($^{GW}Soil_{Ing}$). Reported metal impacts in surface soils have not exceeded the $^{Tot}Soil_{Comb}$ PCL.

Shallow groundwater underlying the Site has been impacted by antimony, arsenic, barium, cadmium, chromium, and lead at concentrations which exceed critical TRRP PCLs for direct ingestion of groundwater ($^{GW}GW_{Ing}$). The shallow groundwater gradient and/or flow direction within the assessment area is likely influenced by the concrete lined channel of White Oak Bayou as well as seasonal groundwater fluctuations and appears to be generally to the northeast. Based on historic sampling and analysis results from a network of ten (10) permanent groundwater monitor wells over four (4) historic sampling events, maximum metal concentrations have generally been reported in groundwater samples collected from monitor well MW-01 located in the apparent contaminant source area, the interior of the former oxbow.

The proposed remedy/response action for impacted groundwater is a City of Houston Municipal Setting Designation (MSD), which would restrict access to such impacted groundwater, effectively eliminating the $^{GW}GW_{Ing}$ exposure pathway from consideration.

APPENDIX B

A description of the current use, and, to the extent know, the anticipated use(s), of the designated property and properties within 500 feet of the boundary of the designated property.

The designated property (the Site) consists of an approximate 9.293-acre tract of land along White Oak Bayou from Shepherd Drive to Patterson Street. The Site is undeveloped and improvements to the Site are limited to re-channelization and improvements to White Oak Bayou. Anticipated use of the designated property will remain unchanged.

A 500-foot field survey was previously conducted in the vicinity of the designated property. The Site is bordered to the north by commercial/industrial development. The Site is bordered to the east by residential development and vacant property, followed by Patterson Street with commercial/industrial developments beyond. The Site is bordered to the south by residential development, industrial development and vacant land followed by Cornish Street. The Site is bordered to the west by Shepherd Drive followed by commercial/industrial development. The general Site vicinity consists of commercial/industrial, undeveloped, and residential properties. Underground public utilities are recorded to be located within the limits of the designated property. Potable water within 500 feet of the designated property is provided by the City of Houston. Based on the results of the field survey, no sensitive receptors exist within a 500-foot radius of the designated property, with the exception of White Oak Bayou which transects the north-central portion of the Site. The attached **Figure B-1** depicts current property use within 500 feet of the designated property boundary.

APPENDIX C

A site map(s) showing:

a. The location of the designated property.
b. The topography of the designated property as indicated on publicly available sources, which must note the watershed including the nearest surface water body and whether the designated property is located in a floodplain or floodway, as those terms are defined in Chapter 19 of the Code of Ordinances.
c. The detected area of groundwater contamination.
d. The location of all soil sampling locations and all groundwater monitoring wells.
e. Groundwater gradients, to the extent known, and direction of groundwater flow.
f. The ingestion protective concentration level exceedence zone for each contaminate of concern, to the extent known.

APPENDIX D

For each contaminant of concern within the ingestion protective concentration level exceedence zone provide the following:

a. A description of the ingestion protective concentration level exceedence zone and the non-ingestion protective concentration level exceedence zone, including a specification of the horizontal area and the minimum and maximum depth below ground surface.
b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units.
c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water).

Based on environmental investigations at the designated property, antimony, arsenic, barium, cadmium, chromium, and lead have been identified in the shallow groundwater bearing unit at concentrations which exceed the ingestion protective concentration levels ($^{GW}GW_{Ing}$). No COCs have been identified in groundwater at concentrations which exceed the non-ingestion protective concentration levels. Therefore, a non-ingestion protective concentration level exceedance zone does not exist at the site. No COCs have been identified in Site soil at concentrations with exceed the TCEQ TRRP direct exposure protective concentration levels ($^{Tot}Soil_{Comb}$).

A description of each COC, the ingestion and non-ingestion PCLE zone, vertical and horizontal extent, and geochemical properties is provided below.

COC: Antimony
Maximum Concentration: 0.0504 mg/L
Ingestion-Based PCL (Residential $^{GW}GW_{ing}$): 0.006 mg/l
Ingestion-Based PCLE Zone:
Length: 560 ft
Width: 920 ft
Min. Depth: 10 ft bgs
Max. Depth: 30 ft bgs
Total Area: 2.29 acres
Non-Ingestion - Based PCL ($^{Air}GW_{Inh-V}$): NE (no TRRP PCL Established)
Non-Ingestion - Based PCLE Zone: None
Geochemical/Physical Properties
Molecular Weight 121.75
Density/Specific Gravity 6.68 g/cm^3
Solubility in Water: Insoluble
Groundwater Migration: Low

COC: Arsenic
Maximum Concentration: 0.147 mg/L
Ingestion-Based PCL (Residential $^{GW}GW_{ing}$) 0.01 mg/L

Ingestion-Based PCLE Zone:
Length: 650 ft
Width: 600 ft
Min. Depth: 10 ft bgs
Max. Depth: 30 ft bgs
Total Area: 6.57 acres
Non-Ingestion - Based PCL ($^{Air}GW_{Inh-V}$): NE (no TRRP PCL Established)
Non-Ingestion - Based PCLE Zone None
Geochemical/Physical Properties
Molecular Weight 74.92
Density/Specific Gravity 5.72 g/cm^3
Solubility in Water: Insoluble
Groundwater Migration: Low

COC: Barium
Maximum Concentration: 4.29 mg/L
Ingestion-Based PCL (Residential $^{GW}GW_{ing}$) 2 mg/L
Ingestion-Based PCLE Zone:
Length: 220 ft
Width: 100 ft
Min. Depth: 10 ft bgs
Max Depth: 30 ft bgs
Total Area: 0.31 acres
Non-Ingestion - Based PCL ($^{Air}GW_{Inh-V}$): NE (no TRRP PCL Established)
Non-Ingestion - Based PCLE Zone None
Geochemical/Physical Properties
Molecular Weight 137.34
Density/Specific Gravity 3.51 g/cm^3
Solubility in Water: Low Solubility
Groundwater Migration: Low

COC: Cadmium
Maximum Concentration: 0.0159 mg/L
Ingestion-Based PCL (Residential $^{GW}GW_{ing}$) 0.005 mg/L
Ingestion-Based PCLE Zone:
Length: 120 ft
Width: 70 ft
Min. Depth: 10 ft bgs
Max Depth: 30 ft bgs
Total Area: 0.12 acres
Non-Ingestion - Based PCL ($^{Air}GW_{Inh-V}$): NE (no TRRP PCL Established)
Non-Ingestion - Based PCLE Zone None
Geochemical/Physical Properties
Molecular Weight 112.41
Density/Specific Gravity 8.642 g/cm^3
Solubility in Water: Insoluble
Groundwater Migration: Low

COC: Chromium
Maximum Concentration: 0.942 mg/L

Ingestion-Based PCL (Residential $^{GW}GW_{ing}$) 0.1 mg/L
Ingestion-Based PCLE Zone:
Length: 620 ft
Width: 300 ft
Min. Depth: 10 ft bgs
Max Depth: 30 ft bgs
Total Area: 2.55 acres
Non-Ingestion - Based PCL ($^{Air}GW_{Inh-V}$): NE (no TRRP PCL Established)
Non-Ingestion - Based PCLE Zone None
Geochemical/Physical Properties
Molecular Weight 51.996
Density/Specific Gravity 7.19 g/cm^3
Solubility in Water: Insoluble
Groundwater Migration: Low

COC: Lead
Maximum Concentration: 3.23 mg/L
Ingestion-Based PCL (Residential $^{GW}GW_{ing}$) 0.015 mg/L
Ingestion-Based PCLE Zone:
Length: 750 ft
Width: 640 ft
Min. Depth: 10 ft bgs
Max Depth: 30 ft bgs
Total Area: 8.07 acres
Non-Ingestion - Based PCL ($^{Air}GW_{Inh-V}$): NE (no TRRP PCL Established)
Non-Ingestion - Based PCLE Zone None
Geochemical/Physical Properties
Molecular Weight 207.21
Density/Specific Gravity 11.34 g/cm^3
Solubility in Water: Insoluble
Groundwater Migration: Low

APPENDIX E

Provide for each contaminant of concern within the designated groundwater:

a. A description of the ingestion protective concentration level exceedence zone and the non-ingestion protective concentration level exceedence zone, including a specification of the horizontal area and the minimum and maximum depth below ground surface.
b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units.
c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water).

A description of each COC in groundwater at the designated property, as well as those COCs that are defined by a PCLE zone, along with its basic geochemical properties, is presented in ***Appendix D***. A tabular listing of the maximum concentration for each groundwater COC is provided in ***Appendix F***, **Table 1**.

APPENDIX F

A table displaying the following information for each contaminant of concern, to the extent known:

a. The maximum concentration level for soil and groundwater, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units.
b. The critical protective concentration level without the municipal setting designation, highlighting any exceedences.

Groundwater

Metals, including antimony, arsenic, barium, cadmium, chromium and lead, were detected at concentrations exceeding their respective TRRP $^{GW}GW_{Ing}$ Tier 1 PCLs. Based on the proposed response actions, institutional controls such as this MSD will be used to gain closure for groundwater at the designated property, thus eliminating the groundwater ingestion pathway. **Table 1** in ***Appendix F*** presents the maximum concentration of each COC in the groundwater at the designated property.

Table 1

COC	$^{GW}GW_{Ing}$ Ingestion PCL		$^{Air}GW_{Inh-V}$ Non-Ingestion PCL		Conc (mg/L)
	(mg/L)	Tier	(mg/L)	Tier	Max
Antimony	0.006	1	NE	1	**0.0504**
Arsenic	0.01	1	NE	1	**0.147**
Barium	2	1	NE	1	**4.29**
Cadmium	0.005	1	NE	1	**0.0159**
Chromium	0.1	1	NE	1	**0.942**
Lead	0.015	1	NE	1	**3.23**

Notes:

1. Yellow highlite indicates critical PCL without MSD
2. NE – Not established (No TRRP PCL defined)

Soils

Metals, including arsenic, barium, cadmium, lead, mercury and silver were detected in surface soil at concentrations exceeding the TRRP Tier 1 $^{Soil}GW_{Ing}$ PCLs. **Table 2** in ***Appendix F*** depicts the maximum soil concentration for COCs at the site.

Table 2

COC	$^{Tot}Soil_{Comb}$ PCL			$^{GW}Soil_{Ing}$ [1] PCL			$^{Air}Soil_{Inh-V}$			TSBC	Conc (mg/kg)
	(mg/kg)	Tier	Source area size (acres)	(mg/kg)	Tier	Source area size (acres)	(mg/kg)	Tier	Source area size (acres)		Max
Arsenic	24	1	0.5	5.0	1	0.5	NE	1	0.5	5.9	**23.1**
Barium	8100	1	0.5	440	1	0.5	NE	1	0.5	300	**514**
Cadmium	52	1	0.5	1.5	1	0.5	NE	1	0.5	NE	**1.82**
Lead	500	1	0.5	3.0	1	0.5	NE	1	0.5	15	**342**
Mercury	3.6	1	0.5	0.0078	1	0.5	4.6	1	0.5	0.04	**1.7**
Silver	97	1	0.5	0.48	1	0.5	NE	1	0.5	NE	**0.728**

Notes:

1. Yellow highlite indicates critical PCL without MSD
2. TSBC – TCEQ Texas Specific Background Concentration
3. NE – Not established (No TRRP PCL and/or TSBC defined)

APPENDIX G

*A statement as to whether the plume of contamination is stable (i.e. no change), or contracting, and delineated, **with the basis for that statement**. Please include historical sampling data.*

Based on the historical groundwater monitoring that has been performed, the following conclusions have been drawn for the designated property:

Groundwater is impacted by antimony, arsenic, barium, cadmium, chromium, and lead. Based on groundwater analytical results of delineating monitor wells MW-04 through MW-10, the plume of contamination is delineated. Reported arsenic concentrations in the southwest most delineating monitor well (MW-07) appear to be the result of unrelated and unassociated sources of contamination originating from the off-site property located on the northeast corner of Shepherd Drive and Cornish Street. Current and historical uses of the off-site property include an auto salvage yard, filling station with underground fuel tanks and auto repair facility. Malcolm Pirnie, on behalf of TxDOT, has documented sources of contamination on the referenced off-site property in historical site assessment reports prepared in 2010. The reported COCs include various metals in soil and arsenic in groundwater.

Surface water samples collected from White Oak Bayou at locations upstream, adjacent to, and downstream of the apparent source area reported all COCs at concentrations below the TCEQ TRRP ingestion protective concentration levels and EPA Drinking Water Maximum Contaminant Levels (MCLs). Therefore, reported COCs in the shallow groundwater bearing unit within the apparent source area do not appear to be impacting surface water within the concrete lined channel of White Oak Bayou. Based on surveyed elevation data provided by HCFCD, the bottom of the concrete lined channel of White Oak Bayou in the vicinity of the apparent source area is at an elevation of 15 feet above mean sea level. Based on the observed lithology from soil borings associated with monitor wells MW-01 through MW-03, the top of the groundwater bearing unit is at an elevation of approximately 22 feet above mean sea level.

Based on the results of Mann-Kendall Statistical Tests performed for the four sampling events conducted from May 2011 to October 2012, concentrations of COCs, including antimony arsenic, barium, cadmium, chromium, and lead demonstrate stable to decreasing trends in the source area monitoring wells (MW-01 through MW-03). Mann-Kendall Models incorporating the most recent (February 2013) groundwater sampling data reported similar results for monitor wells MW-01 and MW-02. Due to the non-representative analytical results caused by poor well performance and high sample turbidity/suspended solids in the groundwater sample, a Mann-Kendall model incorporating the most recent (Feb 2013) groundwater data was not run for monitor well MW-03. ***Results of Mann-Kendall Statistical Tests are provided on the following pages.***

Mann-Kendall Statistical Test
Form 4400-215 (2/2001)

Notice: This form is the DNR supplied spreadsheet referenced in Appendices A of Comm 46 and NR 746, Wis. Adm. Code. It is provided to consultants as an optional tool for groundwater contaminant trend analysis to support site closure requests under s. Comm 46.07, Comm 46.08, NR 746.07, NR 746.08, Wis. Adm. Code. Use this form or a manual method when seeking case closure under those rules. Earlier versions of this form should not be used.

Instructions: Do not change formulas or other information in cells with a blue background, only cells with a yellow background are used for data entry. To use the spreadsheet, provide at least four rounds and not more than ten rounds of data that is not seasonally affected. Use consistent units. The spreadsheet contains several error checks, and a data entry error may cause "DATA ERR" or "DATE ERR" to be displayed. Dates that are not consecutive will show an error message and will not display the test results. The spreadsheet tests the data for both increasing and decreasing trends at both 80 percent and 90 percent confidence levels. If a declining trend is present at 80 percent but not at 90 percent, a site is still eligible for closure under Comm 46 and NR 746 provided that other conditions in those rules are met. If an increasing or decreasing trend is not present, an additional coefficient of variation test is used to test for stability, as proposed by Wiedemeier et al, 1999. For additional information, refer to the Interim Guidance on Natural Attenuation for Petroleum Releases, dated October 1999. Refer to the guidance for recommendations on data entry for non-detect values.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by THE GOODMAN CORPORATION were identified for the years listed below (selected maps only*). The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

1	1925	Mixed Residential / Commercial	105 -- Mixed Res/Com, Res Structure	Low	2,170 *	Displayed

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

3	1920	Residential Single Family	101 -- Residential 1 Family	Low	900 *	View

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

***** All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

1	1955	Residential Single Family	101 -- Residential 1 Family	Average	1,294 *	Displayed

* All HCAD residential building measurements are done from the exterior, with individual measurements rounded to the closest foot. This measurement includes all closet space, hallways, and interior staircases. Attached garages are not included in the square footage of living area, but valued separately. Living area above *attached* garages is included in the square footage living area of the dwelling. Living area above *detached* garages is not included in the square footage living area of the dwelling but is valued separately. This method is used on all residential properties in Harris County to ensure the uniformity of square footage of living area measurements district-wide. There can be a reasonable variance between the HCAD square footage and your square footage measurement, especially if your square footage measurement was an interior measurement or an exterior measurement to the inch.

Subject: **PHASE I ENVIRONMENTAL SITE ASSESSMENT (ESA) DRAFT REPORT REVIEW FOR SHEPHERD DRIVE AND DURHAM DRIVE RECONSTRUCTION FROM IH-610 TO LARKIN STREET – TIRZ 5 WBS No. N-T05000-0005-3**

In response to your request received on March 7, 2018, we have reviewed the subject Phase I ESA Draft Report (Attachment) prepared by The Goodman Corporation (TGC) for Jones and Carter, Inc. on behalf of the Memorial Heights Redevelopment Authority/Tax Increment Reinvestment Zone # 5 (TIRZ 5).

According to Houston Public Works' Infrastructure Design Manual, Chapter 11, when a property is located within the IH-610 loop and it is going to be acquired by the City or involved in divestitures and inter-department transfers, the property must have historical usage searched from the present going back a minimum of 100 years. However, for the City of Houston construction projects, the historical usage search is from the present going back to the property's obvious first development.

Due to the historical nature of the project area, TGC has identified numerous sites of Recognized Environmental Conditions (REC) along Shepherd and Durham Drives. Conducting a subsurface assessment (Phase II ESA) for all identified REC sites may be cost prohibitive. In our opinion, both reconstruction alignments should be declared Potentially Petroleum Contaminated Areas (PPCAs).

Our comments are marked in the report. We look forward to reviewing TGC's revised report.

If you have any questions, please call me at 832-395-2260 or Chad Samani, P.E. at 832-395-2259.

Maher Tanbouz, P.E.
